ABOUT

The Installation

The installation by **Raquel van Haver** will reflect the richness of the stories that *Florijn* has held for over 50 years. It will not only become a **visual icon**, but also a **symbol of connection** between residents, entrepreneurs, and visitors — a work of art that brings stories together and offers a new perspective on one of Amsterdam's most dynamic neighborhoods: Amsterdam Southeast; **the Bijlmer**.

During the evening, we will explore the **social contribution of art in public space** — how art can foster encounters, collaboration, and new impulses within a neighbourhood.

Raquel van Haver's artwork serves as a **source of inspiration** for social and economic opportunities for the residents of Florijn and its surroundings. It highlights the visibility of a community that has demonstrated **cohesion and resilience** for decades — a community full of **talent and potential** ready to flourish further.

ABOUT

The Artist

Raquel van Haver is an award-winning and versatile artist whose monumental paintings, installations, and spatial works tell deeply human stories. Her art connects **the personal and the universal** — themes such as **migration, spirituality, identity,** and **diaspora** take on a powerful, raw, and poetic form in her hands. She recently was honorably appointed **Knight of the Order of the Dutch Lion**.

With her acclaimed exhibition **Spirits of the Soil** at the **Stedelijk Museum Amsterdam**, van Haver established herself as one of the most compelling voices in contemporary art. She received the Royal **Award for Modern Painting** {2018} and has since built an impressive international reputation.

Raquel's work invites **reflection, connection,** and **dialogue** — values that also lie at the heart of this evening. Her art reminds us that beauty is not separate from the world around us, but emerges from the stories we share.

Last chance to see ***The Collateral Kin, A Wise Man's Fear*** after **closure date!**

Raquel van Haver bridges the present, past and future in this exhibition, using contemporary technology and innovative techniques to take a step into the future, with a nod to the history of painting in the Netherlands.

"This work is not only an ode to the city but also a critical reflection on the manners, policies and developments taking place in Amsterdam.

They are 120 unique voices, each with their own relationship to the city, politics, its challenges and dreams.

Together they form a mirror they present to the city's administration and policies."
